

CLEANING FOR HEALTH GREEN CLEANING

Keeping your premises clean today while remaining mindful of our future generations

At Skyline, we're very aware of how we affect your environment. We know you care about your workspace and we also know how by taking small incremental steps locally, they can add up to large scale changes globally.

That's why we adhere to the latest Green Standards and use High

Filtration Backpack Vacuums to improve air quality, we use Micro-fiber Cloths and Mops to absorb dust, and we use Green Seal Chemicals that comply with LEED Certification. We also utilize Recyclable Restroom Products (toilet paper, paper towels, trash liners) for the good of all.

**WE ARE
WHERE
YOU ARE.**
